Who are we?

Since 2012 physiotherapy has been represented in the SSICM by the “Communauté d’Intérêt en Physiothérapie Aigüe” (CIPRA).

With the foundation in September 2020 of the community of interest in physiotherapy, we are pursuing the following goals:

- Networking throughout Switzerland: Breaking down language and geographical borders and incorporating/ embracing cultural differences
- Guarantee of quality and knowledge-transfer
- Mutual reinforcement within the community of interest for further professional development
- Transfer of the latest evidence into clinical practice and SSICM

The integration of our expertise in the SSICM Quality Management department reflects the interdisciplinary approach that is practiced in everyday clinical practice

**We are looking forward to connecting as many
physiotherapists working in Swiss ICU's as possible,
the more people involved,
the richer the interaction**
